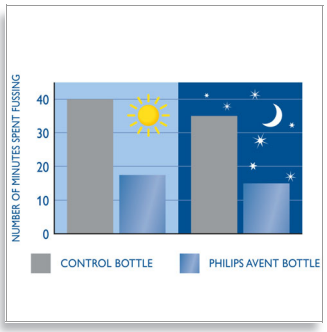
Highlights

Easy latch on

Unique skirt on the teat flexes to your baby's feeding rhythm. Milk will only flow at the pace chosen by your baby for more comfort.

Helps settle your baby



Sleep and nutrition are vital to your baby's health and happiness. A randomised clinical trial was carried out to see whether infant feeding bottle design affects "infant behaviour". The Philips AVENT Classic bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs. 74 min, p=0.05). This was especially true during night-time.

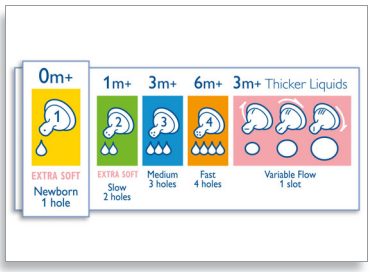
Unique anti-colic valve

The unique two-piece anti-colic system consists of the Philips AVENT teat and adapter ring. As your baby feeds, the unique skirt on the teat flexes to allow air into the bottle instead of your baby's tummy.

BPA free*

This teat is made from silicone - a BPA-free* material

Fit your baby's growing needs



The Philips AVENT Classic bottle offers different flow rates to keep up with your baby's growth. Remember that age indications are approximate as babies develop at different rates. All teats are available in twin packs.

Compatible with Classic bottle

We advise to use Philips AVENT Classic teat only with the Philips AVENT Classic bottle.
